The LANGUAGE AND LINGUISTICS style sheet for chapters of English Collected Papers generally follows The Generic Style Rules for Linguistics

(<http://www.eva.mpg.de/lingua/pdf/GenericStyleRules.pdf>) and The Leipzig Glossing Rules (<https://www.eva.mpg.de/lingua/pdf/Glossing-Rules.pdf>), with only one modifications regarding the style of References: If the title is not only in a different language, but also in a different script, the original script could be provided after the transliteration (following it **without parentheses**).

Manuscripts should be submitted by electronic files in Traditional Chinese or English, single-spaced and kept within 35 pages including an English abstract of 100–300 words and 4–6 keywords, with specialized formatting kept to a minimum. Please spell out the abbreviation if used, and define it as clear as possible in the abstract. Do not cite references in the abstract if possible. Authors are encouraged to use this document directly to edit their papers. If there are any further questions, please contact us via (LLeditor@sinica.edu.tw).

Authors who are not native speakers of English are advised to have their papers checked by a native speaker before submission. Please use only one writing system, sticking either to American English or British English, etc. Times New Roman is the working font for chapters of English Collected Papers, with italic and bold styles reserved for special marking. Please use the symbol “§” to replace the word “section” or “sub-section,” for example: §3.1 or §4.2.3. Where using Chinese characters, please use the font “新細明體”. Please display the International Phonetic Alphabet (IPA) or special characters in Unicode as possible as you can and provide the font file when uploading the final version to the online submission system. We use Word processor as the main editing software, therefore please try to convert to Word file if possible in order to speed up the copyediting process and avoid possible errors. (Times New Roman 9.5, align to the left, first paragraph not indented.)

Keywords: Please provide 4–6 keywords and separate them with commas (Times New Roman 9.5, align to the left; “Keywords” and the colon in bold)

Blust (2017: 185) pointed out that:

Voiced obstruents thus present the speaker with an inherent conflict in phonetic demands that is found in all languages, namely the need to maintain airflow to produce voice, but the simultaneous need to obstruct airflow to produce a stop. Ohala notes that speakers of many languages confront the demands of the AVC by adopting a strategy that permits them to maintain some features of the articulation while surrendering others. (Times New Roman 9.5. Ellipsis in a quotation is indicated by [...].)

Leave a blank line before and after the quotation.

For reference citation given in running text, please pay attention to the following points:

- I. **Page numbers** cited in the running text are provided after the last name and year preceded by a comma. If there are **two or more page numbers** listed, please separate them with **commas**:

References (Times New Roman 12, bold)

1. List the references in alphabetical order by the authors' last names. References from the same author is listed in chronological order from oldest to newest. There is no extra blank line between each reference. (Times New Roman 10.5, use 新細明體 10.5 for Chinese)
2. When there are two or more editors/authors: No commas before the ampersand "&". Last name comes first, followed by a comma and then first name, e.g. Potsdam, Eric & Polinsky, Maria.
3. For English submissions, if the article title is not only in a different language, but also in a different script, the original script could be provided behind the transliteration (following it in parentheses), but for Chinese submissions, the original script goes without parenthesis. Please arrange in the following order: transliteration (italics)→original script (no parentheses, no italics).

Cheng, Ying. 2003. Cong fangyan bijiao kan qingtaici de lishi yanbian. *Journal of Taiwanese Languages and Literature* 1(1). 107–143.

In Chinese submissions:

Chen, Naixiong (陳乃雄). 1989. Wutunhua de dongci xingtai 五屯話的動詞形態. *Minzu Yuwen* 民族語文 1989(6). 26–37.

Note that the dash used for page number ranges is the n-dash, with no spaces surrounding it.

4. Please check each reference carefully, and reconfirm the followings:
 - ☐ Spell out the full name of the authors and/or the editors correctly, including first name and last name. Middle name (if any) goes after the first name, and could be initialized according to the original text, e.g. Goldberg, Adele E.
 - ☐ Some writers have their own way of displaying their names, e.g. R. M. W. Dixon, in this case, the first name does not have to be spelt out fully.
 - ☐ When citing Mandarin names, pay extra attention to their respective spelling systems. Mainland Chinese use Hanyu Pinyin, while Taiwanese use Tongyong Pinyin. Hong

Kong or Macau use the Cantonese system. Please check the original names and surnames carefully.

-) Articles originally cited as “to appear/forthcoming” should be double-checked whether they have already been published. The latest publication information should be provided or updated.
-) If the article/book/journal titles, volume or issue numbers are correct (issue numbers should be provided when applicable): Pay extra attention to the **grammatical parts** such as singular/plural forms, conjunctions and punctuation marks.
-) If a language has certain grammatical rules, the capitalization should follow the rules. For example, German nouns should be first letter capitalized, therefore when citing a German article, the nouns in the title should be first letter capitalized.
-) If the page numbers, publication place (city name, generally only the first city is shown) and publisher are correct.
-) Pay attention to the transliteration when citing foreign references. If possible, ask native speakers to check whether the transliterations and translations are correct.
-) Please double check if all the references have been cited in the text as well as listed in the references.

For further information of the reference style, please refer to the examples listed below:

***Journals:**

1. For article titles and journal titles which are not in English, please provide transliteration and original script. No parentheses are needed. If a journal has official English title, please use the official one instead of transliteration. The order is **transliteration or official English title (italics)→ original script (no parentheses, no italics)**.
2. For journals included in SSCI (<https://jcr.clarivate.com/jcr/browse-journals>), please use their registered names.
3. Titles of journals should have each word capitalized. Titles of articles, including their transliterations and English translations, only have the **first word**, and the **first word after a colon** capitalized.
